Exhibit 1, which Plaintiff would attach to the complaint if permission to amend the complaint is granted, is the following transcript. This is a transcript of the audio from Plaintiff's recording that was introduced in court, another recording he made in the minutes leading up to when he started videorecording, Wiggins' belt tape, and almost all of the police radio, and dispatch telephones.

As noted below, the material taken from "Mocek's camera" between 1434 and 1438 was deleted while camera was held at airport police department between the time of his arrest and the retrieval of his property the following day. Overview

Script of speech in vicinity of Phillip Mocek at Albuquerque Sunport International Airport on November 15, 2009, between 2:32 p.m., seconds after arriving at the document checker podium at a TSA airport barricade, and 3:05 p.m., when he was in a holding cell at the airport police department. With the exception of a 27-second gap between the second and third recordings, continuous audio of the incident was used.

Also includes police radio and communications center telephone calls until 4:54 p.m., when Officer Dilley arrived at the downtown jail to transfer custody of Mocek.

Source of Audio

then downloading later.

end: 2009-11-15 14:38:13

Provided to Mocek by Albuquerque City Attorney's office in response
to Mocek's November 19, 2009 public disclosure requests to

Albuquerque Police and Albuquerque Airport Authority. No description was provided other than a label which read "CASE # 09-11050; CAD # 091100445". Seems to have been created using a hand-held audio recorder that Wiggins can be seen holding in Mocek's video, which sat near Dilley while he completed paperwork with Mocek in holding cell, then traveled with Dilley as he transported Mocek to downtown Albuquerque police department.

Police radio and telephone

Between 15:05, when Dilley disables audio recorder, and 16:54, audio recordings of police radio and communications center telephone calls are transcribed.

Transcription and Timecoding

Transcription was performed by Mocek. Start time for each recording was determined by finding points in the recordings where police radio can be heard then subtracting the difference between the elapsed time of a recording at that point and the time of day used in the filename for the corresponding police radio recording.
